## Objective

---

Seeking a job opportunity as .Net Developer that has daily challenging tasks in one of the cutting-edge market technologies which in turn gives me the ability to develop and produce promising applications.

## Professional Experience

---

Mar 202 to Sep 2020	<b>Backend .NET core developer at Electrified</b> Nasr City, Egypt. Industry: Software house. Team size: 1-10 employees developed backend modules using .net core and EF core with MSSQL to be added to the system
Jan 2020 to Mar 2020	<b>.NET developer at Smarttechsys</b> Nasr City, Egypt. Industry: Software house. Team size: 10-50 employees developed some WPF activities to be added to IRobo system which an RPA using C# WPF, class library .net framework 4.6, and extracting and disassembling some DLLs of RPA activities to be encrypted.

## Internships

---

DEC 2020 to NOW.	<b>Information Technology Institute (ITI)</b> <b>.NET Full Stack Track</b> <b>Courses:</b> C#   OOP   HTML5   CSS3   Bootstrap   Java Script   ES6   MSSQL   Entity Framework   Ado.NET   ASP.NET Framework   ASP.NET Core WEB API 2   Web API Core   Angular 2+
------------------	--

## Education

---

Sep 2014 to June 2018	<b>BSc in Computer Science</b> Fayoum University/Faculty of Computers and Information. Grade: Very Good  <b>Graduation project</b> <b>Title:</b> Aklni <b>Grade:</b> Excellent. <b>Technology stack:</b> C#, .net framework 4.5, MSSQL, EF, JS, jQuery, and Dynamics CRM
-----------------------	---

## SKILL Summary

---

### **Technical:**

- Back-end development using ASP.NET framework, ASP.NET Core (MVC and API).
- Front-end development using: HTML5, CSS3, Bootstrap, and fair knowledge of JavaScript, jQuery, Ajax, Angular2+. (Currently learning ReactJS)
- Programming languages: (C# - basics Java SE- python)
- Database: Microsoft SQL Server
- ORM: LINQ, Ado.net, Entity framework (EF6 and EF core), and Dapper.
- SVC: Git with GitHub, GitLab, and Bitbucket.

### **Conceptual:**

- Good understanding for Object Oriented Analysis and Design
- SOLID and Design Patterns.
- TDD and helicopter view about the DDD.
- Good background Software engineering, System analysis.

### **Languages:**

- Arabic: Native
- English: Professional working proficiency

## Projects:

---

### **EV Platform:**

E-commerce system built upon Virto E-Commerce CMS for selling EV cars and its accessories.

**Technology stack:** DDD with .net core 3.1, .net EF core 3.1.7, SQL Server database, Angular, Liquid.net.

### **IRobo:**

An RPA project which automates the boring stuff and the daily or any process need to be done.

**Technology stack:** C#, WPF, Class Library, .net framework 4.6.

### **Aklni:**

An e-commerce system that provides opportunities to housewives to create a small business selling their homemade food through this system.

**Technology stack:** C#, .net framework 4.5, MSSQL, EF, JS, jQuery, and Dynamics CRM
